

# Training Institute for Dredging

## Open Course Calendar 2010

### **Advanced Pump and Slurry Course, 12/04/2010 - 15/04/2010**

*A four day course: get familiarised with all aspects of pumps and slurry transport and their relation to dredging operations and production calculations in practice.*

### **Beaver Dredger Course 31/05/2010 - 11/06/2010**

*An equipment course for both mechanical engineers and dredge masters. Get a better understanding of governing aspects in the design, operation, control, safety aspects and maintenance & repair of an IHC Beaver cutter suction dredger including the use of this equipment in dredging projects.*

### **General Dredging Course 20/09/2010 - 01/10/2010**

*Learn about all aspects of dredging, such as dredging processes, equipment selection, soil characteristics, automation and control and dredge project management in this two-week intensive course, focused on the design and operation of various types of dredging equipment.*

### **Cutter Simulator Training 25/10/2010 - 30/10/2010**

*Get the most out of your cutter dredger with this six day, very intensive course which is performed with the use of a new generation extremely realistic cutter simulator. The modern dredging operator desk of the simulator is equipped with all automation and controls, which can be expected in a modern cutter suction dredger nowadays. Specific conditions and hazardous situations can be experienced without danger, risk or loss of production.*
